Electronic signature

by **ASRECO**

What is an **electronic signature**?

- Your own, personal signature in the digital world.
- It's as valid and binding as a hand-written signature.
- It's assigned to you and your personal data only.
- It can always be verified.

Polish Electronic Signature Act
of 18 September 2001

Qualified Certificate types

Qualified Certificate **types**

Universal (Personal)

Recommended for all who act on behalf of themselves or other entities (corporations, institutions, local government authorities or central authorities). This Qualified Certificate features the Subscriber's personal data only (name, surname, PESEL (Social ID) or NIP (VAT ID), and country of residence).

Extended Data (Professional)

Recommended for persons of public or professional function where the scope of authority is explicit by law, e.g. city mayors, notaries or legal counsellors. This Qualified Certificate may feature more information, e.g. the data of the represented entity.

E-signature Suite contents

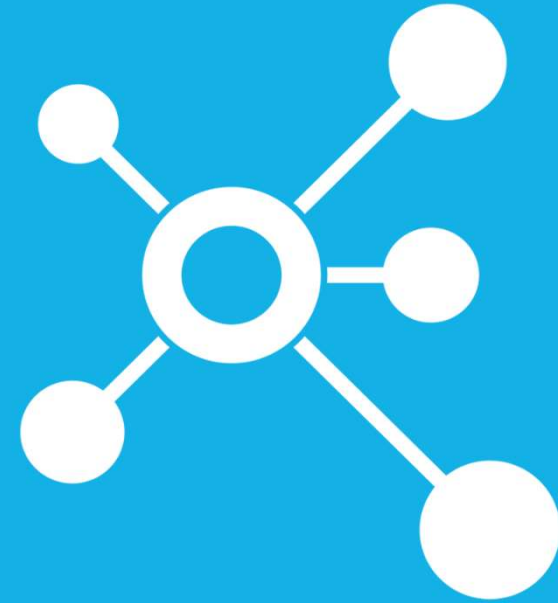

1. Qualified Certificate
2. Cryptographic card for storage of the Qualified Certificate and/or the ID Certificate
3. Encryption card reader
4. Software on CD-ROM for:
 - Cryptographic card management
 - E-signature generation
[available from www.certum.pl]
 - E-signature verification
[available from www.certum.pl]

What the **e-signature** guarantees?

- **Integrity** – Confidence of tamper-proof contents
- **Sender authentication** – Reliable identity verification of signatories
- **Undeniability** – Proves that specific actions are undeniable and empowers safe transactions over the web.

Cooperation with Adobe

CERTUM, is the first **Polish** entity to be featured on the exclusive Adobe Approved Trust List. Now all e-signatures generated by CERTUM customers for PDF files will be recognised as trusted in the popular Adobe programs, anywhere in the world.

ADOBE supports CERTUM Certificates

An e-signed PDF in ADOBE Acrobat Reader

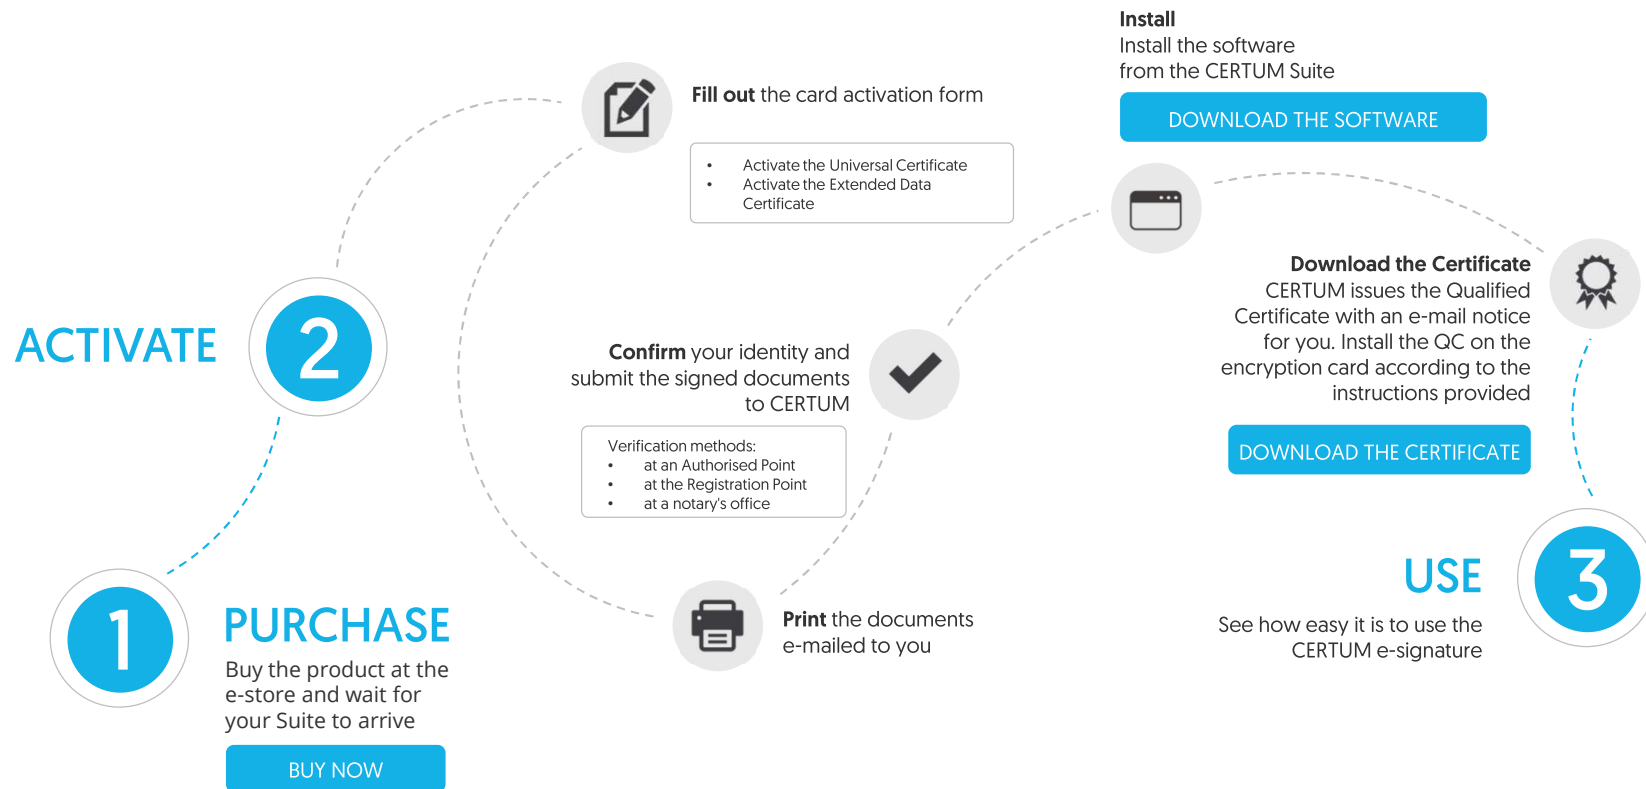

The image shows a screenshot of Adobe Acrobat Reader displaying a signed PDF document. A status bar at the top indicates "Podpisano. Wszystkie podpisy są poprawne." (Signed. All signatures are correct). The document content includes a list of terms and conditions, a QR code, and two digital signature blocks. Callouts provide additional information:

- Top Callout:** Podpisano. Wszystkie podpisy są poprawne.
- Left Callout:** The CERTUM e-signature is automatically verified as trusted in PDF documents
- Bottom-Left Callout:** W imieniu zleceniobiorcy: Dokument poczyniony przez Karol Zieliński; Unize Technologies S Data: 2013.09 10:03:34 CF
- Right Callout:** The image of your e-signature (showing a handwritten signature "Jan Kowalski" and the text "(podpis)")
- Bottom-Right Callout:** The image of your partner's e-signature (showing a digital signature block for Jan Kowalski)

E-signature

**How to get
the e-Signature
in 3 easy steps**

Comfort of work

E-signed documents bear the same legal power as those hand-signed and delivered in person or by mail.

The Qualified Signature is a tested and proven way to streamline business operations; with it you can file official documents:

- Declarations
- Requests
- Applications

Mobility

online business and 24/7 operations

Your business partner works in Cracow,
while you do business in Szczecin.

You want to sign an agreement.

Hard-copy exchange by mail would take days.

**The whole process takes mere minutes
with the e-signature!**

The power of creation.
